## TURN ON/OFF SEQUENCES (FOR OPTIMIZING THE POP PERFORMANCES)

### (A) USING MUTE AND STAND-BY FUNCTIONS

### (B) USING ONLY THE MUTE FUNCTION

To simplify the application, the stand-by pin can be connected directly to Ground. During the ON/OFF transitions is recommend to respect the following conditions.

At the turn-on, the transition mute - play must be made when the SVR pin is higher than 2.5V.

At the turn-off, the TDA7496L must be brought to mute from the play condition when the SVR pin is higher than 2.5V.
